DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 250 words. It is important that the abstract not exceed 250 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "*means*" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because of the use of the term "means" on lines 5, 8 and 9. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

3. Claims 9 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 9 and 10, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones '073 in view of Davis '359. Jones discloses an apparatus for gathering materials (figures 1-15), the apparatus comprising two grasping elements (92,94) each which have shafts (22,24) with grasping means (26,28) at one end. Further, Jones shows the shafts being of 0.5 to 3 inches in diameter

and two to six feet in length (as seen in figures 1 and 5) and the grasping means having tines (as best seen in figure 1) but fails to show the coupling means being moveable or flexible. However, Davis teaches that it is well known in the art to connect to implements (figures 1-3) with a relatively moveable coupling means (figure 4). In reference to the claimed limitations of the size of the coupling means and the material from which it is made, these are an obvious matter of design and would be obvious to one having ordinary skill in the art, absent any showing to the contrary. Further, it would have been obvious to one having ordinary skill in the art to provide the apparatus of Jones with the teachings of Davis in order to provide a material gathering apparatus with a greater operational range.

Conclusion

6. Any inquiry concerning this communication should be directed to Robert Pezzuto at telephone number (703) 308-1012. The examiner can normally be reached Monday through Thursday from 7:00 am to 5:00 pm, Eastern Standard Time.
